D-4 DIESEL CATERPILLAR TREE DIGGER

The above recently acquired D-4 with added horse power digs the complete root systems of trees up to 15 feet in height.

A pressing need for improved methods in digging as in other operations, prompted Dave Lake to have this machine especially designed and constructed right in Shenandoah. An important feature is the hydraulically controlled blade, flexible as to depth and turn, necessary for efficient digging on both regularly farmed and contour farmed land.

Mr. Carl Benedict is the operator.

ENLARGED FACILITIES TO ACCOMMODATE "GROWING PROGRAM"

With a daily average of better than 25,000 per day, one million grafts were made during the 55-56 winter. Over one hundred acres of new farm land was planted to apple grafts this spring. Program includes Hybrid Lilac and Wisteria. Extensive scion orchards at Shenandoah now makes it possible to use, almost exclusively, home-grown quality controlled wood. As grafts are made, they move into an especially condition controlled storage to assure perfect union and minimum vitality loss.
